

# Arched Pelmets

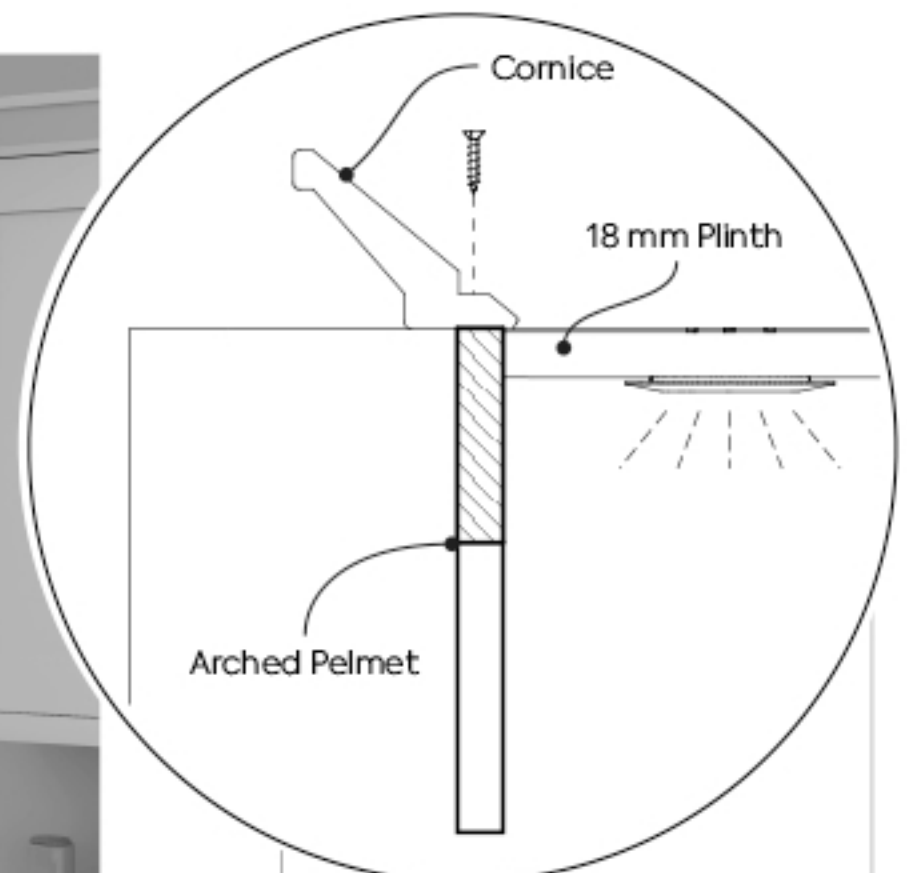

## Option 1

## Option 2

The Arched pelmet is offered in two heights – 120mm high for lengths supplied from 360 mm to 1200mm – and 200mm high for lengths supplied 1200mm to 2540mm. They can be used for a variety of applications, such as window pelmets (as shown below) or also in bedroom applications, to create design features over beds.

As shown here, the Arched Pelmet can be used together with Classic Cornice, and either 18mm plinth or 18mm décor material – simply fix into position using screws, brackets or biscuits as required. Semi-concealed downlights add a great finishing touch.
